How to choose the right camshaft or camshafts for your individual application. Takes the mystery out of camshaft timing and tells you how to find optimum timing for maximum power.

Expert practical advice from an experienced race engine builder on how to build

an ignition system that delivers maximum power reliably. A lot is talked about ignition systems and there is a bewildering choice of expensive aftermarket parts, which all claim to deliver more power. Des Hammill cuts through the myth and hyperbole and tells readers what really works, so that they can build an excellent system without wasting money on parts and systems that simply don't deliver. Ignition timing and advance curves for modified engines is another minefield for the inexperienced, but Des uses his expert knowledge to tell readers how to optimize the ignition timing of any high-performance engine.

The most trustworthy source of information available today on savings and investments, taxes, money management, home ownership and many other personal finance topics.

Cars.

A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced dur-

ing the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.

A small investment in this book could save you a fortune. With the aid of this book's step-by-step expert guidance, you'll discover all you need to know about the 928 you want to buy. A unique point system will help you to place the car's value in relation to condition. This is an important investment-don't buy a car without this book's help.

Some 35 years ago Datsun (now Nissan) introduced the 1970 Datsun 240Z sports car, emphatically disproving the perception that Japanese automakers could only produce economy cars. Designed specifically to appeal to the American market,

the Z car has enjoyed long-term popularity with its sporty styling and impressive performance. Z car fans are loyal and numerous. Over 1.4 million Z cars have been sold worldwide, including 1 million-plus in the U.S. The five generations of Z cars include the latest version, the 350Z introduced in 2003, which has refueled interest in Z cars. This book will thoroughly cover the history of this breakthrough Japanese sports car, and will include official Datsun/Nissan photography and memorabilia such as advertising and international marketing materials.

Complete history of the Silver Spirit and associated Bentley models, including ancestry, design, development and evolution. Technical facts combine with helpful information on ownership.

Think you've seen it all? Think again! from motorised lobsters to eggs, beer bottles, weiners (sausages) and a high heeled shoe, the marketing man's imagination has shown no limitations when it comes to MarketingMobiles.

Millions of cars were equipped with SU carburetors. This book is for those people who wish to tune SU carburetors themselves, irrespective of how many carburetors there

are on the engine or what type of engine it is you are dealing with.

If a racing car could disappoint an entire nation, that was the dramatic fate of Britain's BRM. Few cars of any kind have a more exotic and exciting reputation among enthusiasts than the first BRM, a 16-cylinder wonder machine, heralded as a certain race winner and backed by the nation's motor industry, it was British Racing Motor's bid to put the UK at the top of the Grand Prix series. It did come good -- producing more than 500 horsepower -- but only after the Formula 1 for which it was built had expired.

Oulton Park in the late 1960s was one of the last circuits to play host to non-championship Formula 1 races. Set in beautiful Cheshire parkland, it has always been a favorite with drivers who relish its challenging curves and with spectators who could watch their heroes compete on a true road circuit. Drivers such as Jim Clark, Jackie Stewart, Graham Hill, Surtees, Rindt and Brabham came to Oulton for the Gold Cup and spectators could see and even meet them in the open paddock atmosphere of the time. Major sports & GT races such as the RAC TT were also on the Oulton Park calendar with Lola T70s, GT40s, Ferraris, Lotii and, of course, Chevrons in the hands

of Hulme, Redman, Bonnier and other top drivers. Club race meetings provided variety and plenty of action with the VSCC's Seaman Trophies meeting for vintage and historic racers being the highlight of the season for many racegoers.

The first in a series of five books which chronicle in definitive depth the history of the evergreen 911, from the earliest design studies to the water-cooled cars of today. This volume covers original design, the 901 prototype, the early 911s (including 912s) and the 2.2 litre cars.

A look at the history of ten of Europe's great abandoned race circuits and seen as they are today in stunning photographs.
