A supplemental textbook for middle and high school students, Hoosiers and the American Story provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

Finally, a rebuild and performance guide for GM 6.2 and 6.5L diesel engines! In the late 1970s and early 1980s, there was considerable pressure on the Detroit automakers to increase the fuel efficiency for their automotive and light-truck lines. While efficient electronic engine controls and computer-controlled gas engine technology was still in the developmental stages, the efficiency of diesel engines was already well documented during this time period. As a result, General Motors added diesel engine options to its car and truck lines in an attempt to combat high gas prices and increase fuel efficiency. The first mass-produced V-8 diesel engines of the era, the 5.7L variants, appeared in several General Motors passenger-car models beginning in 1978 and are often referred to as the Olds-

mobile Diesels because of the number of Oldsmobile cars equipped with this option. This edition faded from popularity in the early 1980s as a result of falling gas prices and quality issues with diesel fuel suppliers, giving the cars a bad reputation for dependability and reliability. The 6.2L appeared in 1982 and the 6.5L in 1992, as the focus for diesel applications shifted from cars to light trucks. These engines served faithfully and remained in production until 2001, when the new Duramax design replaced it in all but a few military applications. While very durable and reliable, most of these engines have a lot of miles on them, and many are in need of a rebuild. This book will take you through the entire rebuild process step by step from diagnosis to tear down, inspection to parts sourcing, machining, and finally reassembly. Also included is valuable troubleshooting information, detailed explanations of how systems work, and even a complete Stanadyne DB2 rebuild section to get the most out of your engine in the modern era. If you have a 6.2, or 6.5L GM diesel engine, this book is a must-have item for your shop or library.

As early as 1755, explorers found coal deposits in Ohio's Hocking Valley. The industry that followed created towns and canals and established a new way of life. The first shipment of coal rolled into Columbus in 1830 and has continued ever since. In 1890, the United Mine Workers of America was founded in Columbus. Lorenzo D. Poston became the first of the Hocking Valley coal barons, and by the start of the twentieth century, at least fifty thousand coal miners and their families lived and worked in Athens, Hocking and Perry Counties. Authors David Meyers, Elise Meyers Walker and Nyla Vollmer detail the hard work and struggles as they unfolded in Ohio's capital and the Little Cities of Black Diamonds.

The New York Times–bestselling authors of Hit List examine questionable deaths & “suicides” in this collection of conspiracy theories. For years, the government has put out hits on people that they found “expedient,” or who they felt were “talking too much,” covering up their assassinations with drug overdoses and mysterious suicides. In *Dead Wrong*, a study of the scientific and forensic facts of various Government cover-ups, Richard Belzer and David Wayne argue that Marilyn Monroe was murdered and that the person who shot Martin Luther King Jr. was ordered to do so by the government. They also examine many other terrifying lies we've been told throughout our country's history. The extensive research shows how our government has taken matters into its own hands, plotting murder whenever it saw fit. Belzer and Wayne also examine the deaths of White House Counsel Vincent Foster, U.N. Weapons Inspector Dr. David C. Kelly, and bio-weapons expert Dr. Frank Olson, as well as the cases of two murders directly linked Lyndon B. Johnson, the 36th President of the United States. “Big Brother” is watching you—through the scope of a sniper rifle. *Dead Wrong* will give you the straight facts on some of the most controversial and famous deaths this country has ever seen. The harsh reality is that our government only tells us what we want to hear, as they look out for their own best interests and eliminate anyone who gets in their way.
