Developed for use by Public Housing Authorities, this workbook provides a guide for conducting a research effort to evaluate crime victimization intervention programs by collecting survey data from residents of public housing developments where the intervention programs are planned. Organized by the major activities in a survey research project -- questionnaire design, sampling methodology, & data collection preparation, processing & analysis, the information provided in each section is designed to provide the basic steps & tools to conduct each specific part of the research project. Illustrated.

Discharge Planning for Home Health Care is a comprehensive, step-by-

step guide to assessing the needs of patients and establishing a coordinated hospital-to-home discharge plan. The referral format and assessment tools provide the user with an organized and systematic approach for the transition of the patient through the continuum of care. This comprehensive resource is based on current reimbursement and regulatory issues and contains over 150 tools for easy application to a broad spectrum of health care settings.

In the field of financial risk management, the 'sell side' is the set of financial institutions who offer risk management products to corporations, governments, and institutional investors, who comprise the 'buy side'. The sell side is often at a significant advantage as it employs quantitative experts who

provide specialized knowledge. Further, the existing body of knowledge on risk management, while extensive, is highly technical and mathematical and is directed to the sell side. This book levels the playing field by approaching risk management from the buy side instead, focusing on educating corporate and institutional users of risk management products on the essential knowledge they need to be an intelligent buyer. Rather than teach financial engineering, this volume covers the principles that the buy side should know to enable it to ask the right questions and avoid being misled by the complexity often presented by the sell side. Written in a user-friendly manner, this textbook is ideal for graduate and advanced undergraduate classes in finance and risk management, MBA students spe-

cializing in finance, and corporate and institutional investors. The text is accompanied by extensive supporting material including exhibits, end-of-chapter questions and problems, solutions, and

PowerPoint slides for lecturers.
