#### **SKIDOO 640 NORDIC ROTAX ENGINE**

Let's say we have one engine producing 70 pound-feet of torque at 8000 RPM. That engine would be producing 106 HP. Another engine may be tuned differently and produces its peak horsepower at a little more than 11,000 RPM while making 60 pound-feet of torque. The power band of an engine is the range of RPM where the engine produces usable power.
