Some say Demiel ben Yusef is the world's most dangerous terrorist, personally responsible for bombings and riots that have claimed the lives of thousands. Others insist he is a man of peace, a miracle worker, and possibly even the Son of God. His trial in New York City for crimes against humanity attracts scores of protestors, as well as media and religious leaders from around the world. Cynical reporter Alessandra Russo heads to the UN hoping for a piece of the action, but soon becomes entangled in controversy and suspicion when ben Yusef singles her out for attention among all other reporters. As Alessandra begins digging into ben Yusef's past, she is already in more danger than she knows—and when she is falsely accused of murder during her investigation, she is forced to flee New York. On the run from unknown enemies, Alessandra finds herself on the trail of a global conspiracy and a story that could shake the world to its foundations. Is Demiel ben Yusef the Second Coming or the Antichrist? The truth may lie in the secret history of the Holy Family, a group of Templars who defied the church, and a mysterious relic stained with the sacred blood of Christ Himself.

driver was one of those protagonists on their quest for rebellion and fame. A band labelled as infamous, but their early Punk 'career' remained often nebulous. 'A Case of Pride' is the full story of young adventures told in an unstained and authentic way...

The memoir of a man and woman who escaped into the forest, joined the Jewish partisans—and fell in love—as Hitler laid waste to their Polish hometowns. Jack and Rochelle first met at a youth dance in Poland before the war. They shared one dance, and Jack stepped on Rochelle’s shoes. She was unimpressed. When the Nazis invaded eastern Poland in 1941, both Jack (in the town of Mir) and Rochelle (in the town of Stolpce) wit-

nessed the horrors of ghettoization, forced labor, and mass killings that decimated their families. Jack and Rochelle managed, in their separate ways, to escape into the forest. They reunited, against all odds, in the winter of 1942–43 and became Jewish partisans who fought back against the Nazis. The couple’s careful courtship soon blossomed into an enduring love that sustained them through the raging hatred of the Holocaust and the destruction of the lives they had known. Jack and Rochelle’s story, told in their own voices through extensive interviews with their son, Lawrence, has been in print for twenty years and is celebrated as a classic of Holocaust memoir literature. This is the first electronic edition. “A story of heroism and of touching romance in a time of fear and danger.” —USA Today This popular guide is a must for 2010, when people around the world will be encouraged to discover their place in the universe through the observation of the day and night skies.

What comes after neoliberalism? In these times of health emergency, economic collapse, populist anger and ecological threat, societies are forced to turn inward in search of protection. Neoliberalism, the ideology that presided over decades of market globalisation, is on trial, while state intervention is making a spectacular comeback amid lockdowns, mass vaccination programmes, deficit spending and climate planning. This is the Great Recoil, the era when the neo-statist endopolitics of national sovereignty, economic protection and democratic control overrides the neoliberal exopolitics of free markets, labour flexibility and business opportunity. Looking back to the role of the state in Plato, Machiavelli, Hobbes, Hegel, Gramsci and Polanyi, and exploring the discourses,

electoral programs and class blocs of the nationalist right and socialist left, Paolo Gerbaudo fleshes out the contours of the different statisms and populisms that inform contemporary politics. The central issue in dispute is what mission the post-pandemic state should pursue: whether it should protect native workers from immigration and the rich against redistributive demands, as proposed by the right's authoritarian protectionism; or reassert social security and popular sovereignty against the rapacity of financial and tech elites, as advocated by the left's social protectivism. Only by addressing the widespread sense of exposure and vulnerability may socialists turn the present phase of involution into an opportunity for social transformation.

This book focuses on the use of molecular tools to study small populations of rare and endangered mammals, and presents case studies that apply an evolutionary framework to address innovative questions in the emerging field of mammalian conservation genomics using a highly diverse set of novel molecular tools. Novel and more precise molecular technologies now allow experts in the field of mammology to interpret data in a more contextual and empirical fashion and to better describe the evolutionary and ecological processes that are responsible for the patterns they observe. The book also demonstrates how recent advances in genetic/genomic technologies have been applied to assess the impact of environmental/anthropogenic changes on the health of small populations of mammals. It examines a range of issues in the field of mammalian conservation genomics, such as the role that the genetic diversity of the immune system plays in disease protection and local adaptation; the use of noninvasive techniques and genomic banks as a resource for monitoring and restoring populations; the structuring of population by physical barriers; and genetic diversity. Further, by integrating research from a variety of areas - including population genetics, molecular ecology, systematics, and evolutionary and conservation biology - it enables readers to gain a deeper understanding of the conservation biology of mammals that are at increasing risk of extinction at local, regional and global scales. As such, it offers a unique re-

source for a broad readership interested in the conservation biology of mammals and conservation management strategies to better preserve biodiversity.

These days, Richmond is a city of winter balls and garden parties on soft summer

evenings, a city of private clubs where white-haired old gentlemen, with their martinis or mint juleps in hand, still genuflect in front of portraits of Robert E. Lee. But it's also a city of brutal crime scenes and drug corners. It's a city of world-class ad agencies and law firms, a city of the FFV (First Families of Virginia) and a city of immigrants - from India, Vietnam and Africa to Massachusetts, New York and New Jersey.
