This colorful book captures some of the most beautiful and rare scale models of American Ford, Edsel, Lincoln, and Mercury cars and light trucks from the classic 1930-69 period. During the last thirty years, a small number of builders have devoted themselves to making, by hand, model cars in scale. Often limited to only a few hundred pieces, these unusual and expensive models have flawless finishing and astounding detail. For the first time ever in one source, the author has assembled hundreds of high-resolution color photographs from his and others' private collections, and from the builders themselves. Read about the history of these Ford replicas, the cars they are mod-

elled upon, and learn where you can get them. This book is a must read for people who enjoy scale models and Ford Motor Company cars.

Automotive technology.

From the late 19th century the progress of the movies has paralleled that of the motorcar. Now, for the first time, these developments are chronicled through the medium of the Movie Poster. The book celebrates the progression from the simple and crude, through the functional, the ambitious, the barking mad, right up to today's high-tech, computer generated, often soulless examples of both cinema and automobile. By charting the poster art of the movies chronologically, the book takes you on a journey through the 20th Century in black and white, sepia, hand coloring, stone-litho, and glorious Technicolor. The book shows the obsessively accurate, the artist's impression, the photographic and the wildly imaginative depictions of the automobile. The development of product placement in marketing is well-illustrated. Why did the Mustang appear in so little publicity for Bullitt? Where was the Mini in most of the world's publicity for The Italian Job? Why wasn't the Alfa Romeo Dueto prominent in the advertising of The Graduate? The book doesn't provide intricate plot lines or vast cast lists; there are many reference works, both in books and on-line that supply this detail. Instead it shows how different countries promoted the same movie and give a

brief guide to buying posters of movies safely. Primarily this is a book to wallow in, beautifully photographed artwork is guaranteed to bring memories favorite cars in movies and gives a fascinating insight into the evolution of cinema, marketing and the automobile. With 250 color photos, this book is a fascinating feast in all respects. With 250 pictures of rare and original posters and a star rating system for rarity, this is a beautiful book to browse and a valuable investment guide.
