This is a book about young men who learned to play baseball during the 1930s and 1940s, and then went on to play for one of the most exciting major-league ball clubs ever fielded, the team that broke the colour barrier with Jackie Robinson. It is a book by and about a sportswriter who grew up near Ebbets Field, and who had the good fortune in the 1950s to cover the Dodgers for the Herald Tribune. This is a book about what happened to Jackie, Carl Erskine, Pee Wee Reese, and the others when their glory days were behind them. In short, it is a book fathers and sons and about the making of modern America. 'At a point in life when one is through with boyhood, but has not yet discovered how to be a man, it was my fortune to travel with the most marvelously appealing of teams.' Sentimental because it holds such promise, and bittersweet because that promise is past, the first sentence of this masterpiece of sporting literature, first published in the early '70s, sets its tone. The team is the mid-20th-century Brooklyn Dodgers, the team of Robinson and Snyder and Hodges and Reese, a team of great triumph and historical import composed of men whose fragile lives were filled with dignity and pathos. Roger Kahn, who covered that team for the New York Herald Tribune, makes understandable humans of his heroes as he chronicles the dreams and exploits of their young lives, beautifully intertwining them with his own, then recounts how so many of those sweet dreams curdled as the body of these once shining stars grew rusty with age and battered by experience.

The award-winning author of *Winter World* presents an accessible discussion of animal survival in the hot season, exploring the ways in which animals make the most of the summer's short span by efficiently compacting most of their procreative and survival activities.

Traces a year of dramatic global change in the aftermath of a massive early nineteenth-century Indonesian volcanic eruption that disrupted weather patterns and triggered food shortages, religious revivals, migrations, and a typhus epidemic.

In a *Summer Season* is one of Elizabeth Taylor's finest novels in which, in a moving and powerful climax, she reveals love to be the thing it is: beautiful, often funny, and sometimes tragic. 'You taste of rain', he said, kissing her. 'People say I married her for her money', he thought contentedly, and for the moment was full of the self-respect that loving her had given him. Kate Heron is a wealthy, charming widow who marries, much to the disapproval of friends and neighbours, a man ten years her junior: the attractive, feckless Dermot. Then comes the return of Kate's old friend Charles - intelligent, kind and now widowed, with his beautiful young daughter. Kate watches happily as their two families are drawn together, finding his presence reassuringly familiar, but slowly she becomes aware of subtle undercurrents that begin to disturb the calm surface of their friendship. Before long, even she cannot ignore the gathering storm . . .

Little Lava is a farm on the west coast of Iceland. No roads lead to it; the way lies across a lagoon flooded twice a day by the tide. A lava field borders the farm. From the house, views give onto mountains, volcanoes, rugged coast, and the pure Icelandic sky. In *Summer at Little Lava*, Charles Fergus tells how he fixed up an abandoned house on the farm and spent a summer there with his wife and their young son-living day to day in great simplicity, without heat, electricity, running water, or other

conveniences. Inspired by Henry Beston's classic book, *The Outermost House*-about a year Beston spent living in a cottage on Cape Cod-Fergus sought a place at the outer limits of civilization, and on the coast of Iceland he found it. As it happened, there was a sudden death in his family-the cruel, pointless murder of his mother at her home in Pennsylvania; and so, in the twilight open spaces of Iceland, Fergus confronted his grief, in the midst of the country's abundant wildlife and distinctive geology, its history and mythology. The little house on the coast became a refuge as he sought to recover himself and the meaning of his life. "Little Lava was a place where I could pass the days in peace," he tells us, "where I could take the first steps into a future that, I hoped, would not be so dimmed with grief and pain." *Summer at Little Lava* is a wise and vigilant book. It touches on Iceland and Icelanders, birds and nature, tragedy and personal loss; in strong, resonant prose, it evokes the strange and compelling landscape of Iceland.

This excellent resource provides help for ministers who must plan their sermons not only according to the liturgical church year but also in response to the secular calendar of national holidays and public ceremonies, and in response to the program calendar of local and denominational emphases. Individual chapters discuss preaching about racial relations; family, church, and nation; the global witness of the church; work; evangelism; stewardship; and giving thanks. Suggestions for sermons on each theme are provided as well.

A folk-taxonomy is a semantic field that represents the particular way in which a language imposes structure and order upon the myriad impressions of human experience and perception. Thus, for example, the experience of color in modern English is structured around an inventory of twelve "basic" color terms; but languages vary in the number of basic color terms used, from thirteen or fourteen terms to as few as two or three. Anthropological linguists have been interested in the comparative study of folk-taxonomies across contemporary languages, and in their studies they have sometimes proposed evolutionary models for the development and elaboration of these taxonomies. The evolutionary models have implications for historical linguistics, but there have been very few studies of the historical development of a folk-taxonomy within a language or within a language family. Folk-Taxonomies in Early English undertakes this task for English, and to some extent for the Germanic and Indo-European language families. The semantic fields studied are basic color terms, seasons of the year, geometric shapes, the five senses, the folk-psychology of mind and soul, and basic plant and animal life-forms. Anderson's emphasis is on folk-taxonomies in Old and Middle English, and also on the implications of semantic analysis for our reading of early English literary texts.

A collection of six traditional tales collected at Fort Peck reservation in northern Montana, which were originally intended to teach young members of the tribe about their history and culture.

In a year shaped by national tragedy, baseball was shaped by amazing pitching--culminating in a victory by a Detroit Tigers team that faced off against Bob Gibson's St. Louis Cardinals, the 1967 World Series defending champions.

Thirteen-year-old Brian lives in a trailer on a forgotten patch of land with his divorced and uncaring father. His older brother Lucien, physically and mentally disabled, has been institutionalized for years. While Lucien's home is undergoing renovations, he is sent to live with his father and younger brother for the summer. Their detached father leaves Brian to care for Lucien's special needs. But how do you look after someone when you don't know what they need? How do you make the right choices when you still have so much to discover?
