Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

For a busy clinician in the Emergency Department, the ability to spot a lethal cardiac condition is critical. Rapid Interpretation of ECGs in Emergency Medicine fills a gap in ECG training in an easy-to-use, highly visual format. ECG patterns, gathered from patient records and from the files of physicians at the Harvard-affiliated hospitals, represent the range of pathologies that hospitalists, internal medicine physicians, family medicine physicians, and emergency medicine physicians must recognize. The format of Rapid Interpretation of ECGs in Emergency Medicine is to first show an ECG in its native state to give you the chance to recognize and interpret salient features. The page can then be flipped to look at the same ECG with abnormal patterns enlarged, highlighted in color, and described in brief text. The ECGs are presented with and without annotations so you can test your diagnostic skills.

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

John Goldberger has been collecting and studying vintage watches for over 25 years, which means he's spent many happy hours at jewelers' shops, flea markets, conventions and auctions around the world. His comprehensive and detailed illustrated book on the Omega family of Swiss timepieces is an indispensable asset to others who share his obsession, and to those who would love to--to armchair collectors. Omega Watches covers the history

of more than 240 vintage models, with emphasis on their outer aspects--including the shape and outline of each case and its dial and movements, which are governing features for the collector, as well as clues to exceptional internal design. Goldberg has created a beautiful visual guide to Omega timepieces from the classic pocketwatch to the modern chronograph. Starting with the first models of the past century, Omega Watches displays the beauty, complexity and the collectibility of classic watches such as the Speedmaster, first produced in 1957, and the Seamaster, both of which are still produced today. All examples depicted are from private collections.

In the last quarter of the twentieth century, urban colleges and universities found themselves enveloped by the poverty, crime, and physical decline that afflicted American cities. Some institutions turned inward, trying to insulate themselves rather than address the problems in their own backyards. Others attempted to develop better community relations, though changes were hard to sustain. Spurred by an unprecedented crime wave in 1996, University of Pennsylvania President Judith Rodin knew that the time for urgent action had arrived, and she set a new course of proactive community

engagement for her university. Her dedication to the revitalization of West Philadelphia was guided by her role not only as president but also as a woman and a mother with a deep affection for her hometown. The goal was to build capacity back into a severely distressed inner-city neighborhood—educational capacity, retail capacity, quality-of-life capacity, and especially economic capacity—guided by the belief that "town and gown" could unite as one richly diverse community. Cities rely on their academic institutions as stable places of employment, cultural centers, civic partners, and concentrated populations of consumers for local business and services. And a competitive university demands a vibrant neighborhood to meet the needs of its faculty, staff, and students. In keeping with their mission, urban universities are uniquely positioned to lead their communities in revitalization efforts, yet this effort requires resolute persistence. During Rodin's administration (1994-2004), the Chronicle of Higher Education referred to Penn's progress as a "national model of constructive town-gown interaction and partnership." This book narrates the challenges, frustrations, and successes of Penn's campaign, and its prospects for long-term change.

This is how the "Datejust", which clearly indicates the date on the dial in a small aperture with a Cyclops lens which enlarges it so as to make it easier to read, was born. The next stage was the launch of the "Day-Date", a perfected model which also indicates, with letters, the days of the week. The day and the date automatically change every evening at midnight. » These are the words of Roger Federer, a living tennis legend, about his Day-Date II: "The reason I like my Day-Date so much is because it is a legendary watch, elegant but with a certain spirit, with a touch of modernity added to its stylish black dial".

Based on her work with over a thousand women across the country, psychologist Helene G. Brenner has learned that women feel the impulse to accommodate, adapt and mold themselves to serve others at their own expense. Her solution is an invigorating new approach to women's psychology. The key to transformation, she explains, is not self-improvement, but self-acceptance—affirming and validating what we truly feel and experience and who we already are. Dr. Brenner shows women how to discover and express what they truly want and value, guiding you toward your own Inner Voice. *I Know I'm In There Somewhere* will show you: - How to embrace, rather than fix, the Inner Voice that has been there all along - How to distinguish the Outer Voices (the expectations of the people around you) from Your Inner Voice (the voice of your true self that goes beyond intuition and guides you wisely towards what is right for you) - What to do when you feel that the essence of who you are is being stifled by external demands and expectations
